SUMMARY

Full-stack engineer experienced in building **AI-powered web platforms**, scalable backend systems, and modern frontend applications. Skilled in **Next.js, FastAPI, MERN stack, and LLM integrations**. Passionate about building intelligent systems that combine **web engineering, automation, and AI** to solve real-world problems.

SKILLS & TECHNOLOGIES

- **Languages:** Python, JavaScript, C++, Java, SQL, Dart, C#, HTML, CSS
- **Frontend:** React.js, Next.js, TailwindCSS, Flutter, React Native
- **Backend:** Node.js, Express.js, FastAPI, Next.js
- **Databases:** MongoDB, PostgreSQL, MySQL, Redis, Firebase
- **AI / ML:** LangChain, RAG Pipelines, NLP, LLM APIs, Groq
- **Infrastructure:** Linux, VPS deployment (DigitalOcean, Contabo), Systemd services
- **Tools:** Git, GitHub, Docker basics, Postman, VS Code
- **Design:** UI/UX Design, Web Design, Graphic Design, Webflow, Figma

PROFESSIONAL EXPERIENCE

Anviro

Full Stack Engineer

Islamabad

August 2025 – Present

- Developed multiple **full-stack AI-enabled web applications** using technologies such as **Next.js, React, FastAPI, and MongoDB**.
- Led development on internal and client-facing platforms, contributing to **system architecture, backend API design, and frontend engineering**.
- Promoted to **Founding Engineer of Finviro**, an AI-powered personal finance platform helping users track finances, manage budgets, and gain actionable insights.
- Played a key role in **product planning, architecture design, and full-stack development** for Finviro across web and mobile platforms.
- Handled **production deployments on VPS infrastructure** including DigitalOcean and Contabo, configuring services with **systemd** and maintaining backend services on Linux servers.
- Designed scalable backend APIs, asynchronous workflows, and integrations supporting AI-assisted product features.

Kreativ Ally

Junior Webflow Web Designer

Remote

Oct 2024 – Dec 2024

- Designed and deployed **5+ responsive websites** using Webflow, improving engagement and user experience.
- Optimized site performance and UI layouts, reducing page load times and improving cross-device compatibility.
- Contributed to web design, branding assets, and UI/UX improvements for client-facing websites.

EDUCATION

FAST NUCES

Bachelors in Computer Science

Islamabad

2021 – 2025

- **Core Focus:** NLP, Deep Learning, Generative AI, Web Programming
- **Activities:** Organizer, NasCon 2023 & 2024 | Active Member, FAST Computing Society

PROJECTS

Finviro – AI Personal Finance Platform

Next.js, React, TypeScript, FastAPI, MongoDB, Redis

- Built a full-stack **AI-powered personal finance platform** aggregating bank accounts, transactions, budgets, and financial insights into a unified dashboard.
- Implemented **AI-assisted transaction processing** using Groq with multi-turn classification, field extraction, Redis conversation state, and MongoDB persistence.
- Developed document ingestion pipelines for bank statements and financial files (PDF, CSV, XLS) using OCR and LLM workflows.
- Implemented budgeting analytics, financial insights, and subscription monetization using Stripe.

AI Video Generation Platform – Multi-Agent Content Automation

CrewAI, Claude, FastAPI, Redis

- Built a **multi-agent AI system** that automatically generates short-form videos using specialized agents for scripting, voiceover generation, B-roll retrieval, video assembly, and QA.
- Designed an orchestrated agent architecture enabling modular reasoning, parallel processing, and autonomous content pipelines.
- Implemented asynchronous pipelines with Redis job queues, FFmpeg-based video assembly, and realtime progress tracking.

EduVantage – Graduate Recommender System

LangChain, MERN Stack, RAG

- Built an AI-powered recommendation system suggesting graduate programs using NLP and RAG pipelines.
- Integrated real-time scraping and LLM-based ranking to generate personalized academic recommendations.

Product Review Platform

MERN Stack

- Developed a full-stack review system with authentication, ratings, admin moderation, and search functionality.

Robotic Multi-Agent Operating System

C/C++

- Simulated a multi-agent robotic environment featuring thread management and inter-process communication.

CERTIFICATIONS

- AWS Academy Graduate – AWS Cloud Data Pipeline Builder
- AWS Academy Graduate – AWS Cloud Web Application Builder
- Full Stack Web Development Bootcamp – Udemy
- Flutter & Dart Complete Guide – Udemy
