SUMMARY

Detail-oriented QA Engineer with 1.5+ years of experience in manual testing of web, mobile, and API-driven applications across e-commerce, fintech, and service platforms. Skilled in functional, regression, and API testing using tools like Postman and Jira. Strong understanding of SDLC and Agile methodologies, with a focus on identifying defects early, improving test coverage, and ensuring stable releases. Collaborative team player with experience working closely with developers and product teams to deliver high-quality software.

EXPERIENCE

QA Engineer

WeRQA

📅 07/2025 - Present

- Executed end-to-end manual testing for web and mobile applications, ensuring stable releases in production environments.
- Performed functional, regression, smoke, and sanity testing for e-commerce and service-based platforms.
- Conducted API testing using Postman to validate request/response data and authentication flows.
- Tested mobile applications (iOS/Android) and admin panels to ensure consistent user experience across platforms.
- Collaborated with developers and product teams to log, track, and retest defects using Jira.
- Monitored defects and supported QA improvements through consistent test execution and reporting.

Associate QA Engineer

WeRQA

📅 01/2025 - 06/2025

- Assisted in functional, regression, smoke, and sanity testing for web and mobile applications.
- Executed detailed test cases and reported bugs using Jira with clear reproduction steps.
- Performed API testing using Postman to validate endpoints, status codes, and data accuracy.
- Worked closely with senior QA engineers and developers to verify fixes and improve application quality.
- Participated in UI/UX validation across different devices and browsers to ensure consistency.
- Contributed to release testing and supported QA documentation and reporting activities.

QA Intern

WeRQA

📅 10/2024 - 12/2024

- Learned and assisted in manual testing processes for web and mobile applications.
- Executed basic test cases and identified UI, functionality, and usability issues.
- Reported defects in Jira and followed up on bug fixes with the QA team.
- Supported smoke and sanity testing before feature releases.
- Gained hands-on experience with Postman for basic API validation and testing workflows.
- Collaborated with team members to understand software testing lifecycle and QA best practices.

PROJECTS

North Tour Guide System

📅 01/2021 - 01/2022

North Tour Guide System

- Performed manual testing on core modules such as authentication, package browsing, and booking workflows.
- Prepared and executed test cases, test scenarios, and test data according to functional requirements.
- Conducted different testing types, including functional, regression, smoke, and exploratory testing.
- Logged, tracked, and re-tested defects to ensure consistent and smooth system behavior.
- Participated in requirement analysis to improve test coverage and identify missing use cases.
- Collaborated with developers to validate bug fixes and enhance performance and usability.

PROJECTS

FreelanceBazar SRE

📅 01/2022 - 12/2022

FreelanceBazar SRE (Software Requirement Engineering)

- Gathered and documented requirements for a freelance marketplace, producing an SRS and ensuring clear traceability for QA validation.
- Built UI prototypes and applied use-case/system modeling to align development, QA, and stakeholders, improving test coverage and defect detection.
- Performed data analysis and validation on datasets using R, applying statistical methods to identify anomalies and ensure data quality.
